

Welcome to the Jadex Active Components 3.0.0-RC80 Documentation

To quickly get an overview about what Jadex Active Components is about you can have a look at the [Getting Started Guide](#), which explains the core concepts. The following chapters introduce concepts with hands-on code examples and help you developing your own Jadex Active Components based applications. For more general information about how Jadex Active Components work, we recommend to check out the [Jadex Active Components User Guide](#) in the *Advanced Guides* section.

To see some example programs in action, you can try out some of the online [Java Webstart applications](#) or the [web applications](#).

For API Documentation of Jadex Active Components 3.0.0-RC80 please visit the [Javadocs page](#).
